

RACE SELECTION

You can select from past 2 days Races - already run with flagged results – these are available free to try and to learn the system.

Live Races are available to paying Subscribers.

RACE VIEW

In this example, because we have chosen a Race already run, the color bands Highlights the Results and Finish Positions:

- Red First (Winner)
- Green Second Place getter
- Yellow Third Place getter
- Blue Fourth Place getter
- Brown All other Finishers

ANALYZE AND FILTER SETTINGS

In this Example, the Race is 6 Furlongs and we have set Filters to Analyze:

- Horses that have run from 5 to 7 Furlongs
- Horses that have finished 1st, 2nd, and 3rd

Active Filter Settings show on top of Filter Panel. You can turn Filters On/Off by clicking on Filter Active/Inactive Tab.

The Analyzed Results have been sorted by the Best Time Column – which in this case puts the winner (Horse 6) to the Top selection; – clicking on top of Columns toggles high/low values. Filters can be stored for later recall.

You can modify these and other Filters like Track Condition, Margins, Weight, etc.

BET SELECTION AND BET CALCULATOR

In this Example we have selected (click on Horse Icon) Horses 6 (the eventual Winner) & 5 to put into the Bet Calculator.

The Bet Calculator shows that the payout - based on current Odds - is 128% with the Bet being \$100 and the Profit \$28, if successful – which in this case it was.

You can select up to 4 Horses and the Bet Calculator will work out the Bet amounts and likely Return based on current Odds.

BET MANAGEMENT PANEL

Betting Tickets (Slips) - In this Example we have looked at 4 Horses but selected three to Bet on for a Win – The Slips show the Bet and likely return at those Odds.

To Register your Win Bets, you can use our SimBet system to register a Simulated Bet, or register a real Win Bet via our in-App logon with AmWager – our ADW Partner – if you have an account with them.

We will be adding other Bet Types in the near future.

BET MANAGEMENT PANEL AND RESULTS

Once the Race has run and the finish positions determined the Bet Management Panel shows the results; Green Highlight shows Winning Bet and \$ amount; Red Highlights shows Losing Bets.

Example shows:

- That Horse 1 won at Evangeline Downs, with a payout of \$165, for a Bet of \$100 across 3 Horses; generating a Profit of \$65.6; and
- Horse 1 also won at Los Alamitos, with a payout of \$132, for a Bet of \$100 across 4 Horses: generating a Profit of \$32.5
- Bet Management Panel also shows Profit/Loss for all Bets on the track & Profit/Loss for the day.

F2W is a Powerful Analytical and Betting Tool, yet easy to master and flash quick to use!

It is as easy as Click, Click, Click!
